

Lab Assignment

Go to your home directory.

Please create a directory named "week2" in your home directory and then navigate into it.

Create directories "os1" and "os2".

Create files "file1.txt" and "file2.txt" with the following content - "this is the content of the first file" and "this is the content of the second file".

Copy "file1.txt" into "week1" and "file2.txt" into "week2".

Make the first file executable.

Make the second file read only.

Place the text "Make the first file executable" 1024 times into the "file2.txt".

Add the line "This is the inserted line" in any place of the "file2.txt"

Copy the content of the file into the new file "file3.txt".

View the permission of the file "file3.txt"

Create the variable named "DAY" and assign the value "what the lovely day is today" to it.

View the list of the variables on your computer.

Create user "testuser".

Login using "testuser" in the system.

Delete user "testuser".
